

Supply Chain Logistics Certification Program

The Certified Logistics Associate Course (CLA) & the Certified Logistics Technician (CLT) courses provide students with knowledge they will need to understand the world of supply chain and related core competencies. The CLA course includes foundational knowledge and modules on the global supply chain, the logistics environment, safety, safe equipment operation, material handling equipment, quality control, workplace communication, teamwork and problem solving and using computers. This course requires 42 hours of instruction. The CLT course includes mid-

level technical knowledge and modules on product receiving, product storage, order processing, packaging and shipment, inventory control, safe handling of hazardous materials, evaluation of transportation modes, customs, dispatch and tracking operations. This course includes 67 hours of instruction including OSHA 10 and Forklift Operation Certifications.
