

Cascade County, MT Petition to Remove ES&S Ballot Count Machines and Return to Paper Ballots and Hand Counting, Etc.

The United States was formed with the notion that the government exists to protect and empower its citizens. This responsibility extends to protecting the security of elections, which can be done only when the government, media, and citizens work together to ensure it. Common sense transparency, simplicity and decentralization are the hallmarks of secure and trustworthy elections. Non-transparent and complex centralized election systems run by private corporations are not. Many Americans have died for this right to have legitimate elections, from our War for Independence to the Civil War, to the 15th Amendment and Civil Rights Movement guaranteeing African Americans the right to vote. In order to prevent election fraud and to ensure the transparency of our elections, electronic and centrally controlled voting must be banned.

In light of this, we the people of Cascade County, Montana petition the Cascade County Commissioners Joe Briggs, Jim Larson and Don Ryan to:

- ban all electronic voting equipment (excludes Automark machines)
- voting allowed with valid ID only
- ban mail-in ballots except for overseas military, disabled or other qualified persons
- ballot turn in on election day only, with one day counting
- create smaller precincts for voting and counting
- clean voter roles by requiring all qualified County residents to re-register

By signing this petition, you acknowledge that you agree.

Cascade County, MT Petition to Remove ES&S Ballot Count Machines and Return to Paper Ballots and Hand Counting, Etc.

The United States was formed with the notion that the government exists to protect and empower its citizens. This responsibility extends to protecting the security of elections, which can be done only when the government, media, and citizens work together to ensure it. Common sense transparency, simplicity and decentralization are the hallmarks of secure and trustworthy elections. Non-transparent and complex centralized election systems run by private corporations are not. Many Americans have died for this right to have legitimate elections, from our War for Independence to the Civil War, to the 15th Amendment and Civil Rights Movement guaranteeing African Americans the right to vote. In order to prevent election fraud and to ensure the transparency of our elections, electronic and centrally controlled voting must be banned.

In light of this, we the people of Cascade County, Montana petition the Cascade County Commissioners Joe Briggs, Jim Larson and Don Ryan to:

- ban all electronic voting equipment (excludes Automark machines)
- voting allowed with valid ID only
- ban mail-in ballots except for overseas military, disabled or other qualified persons
- ballot turn in on election day only, with one day counting
- create smaller precincts for voting and counting
- clean voter roles by requiring all qualified County residents to re-register

By signing this petition, you acknowledge that you agree.
