

500 South BioTower Project

Project Proponent: Salt Lake City Department of Public Utilities
Design Engineer: Bowen Collins & Associates
Contractor: TBD

Project Location

North of Pierpont Avenue – between 1100 West and 1000 West.

Project Purpose

A BioTower will be installed at this location to address frequent odor complaints from residents by using a carbon filtration system that captures odorous air, prevents corrosion in the sewer collection pipes, and releases clean air back into the atmosphere.
