Pest service records from EcoLab indicate an on-going presence of cockroaches and many holes/penetrations that require addressing in addition to removing excessive grease build-up throughout the facility.</p> <p>Corrective Action: This facility is closed until free of pest activity after treatment. Holes and penetrations must be addressed in addition to deep cleaning as specified in service reports provided by EcoLab prior to further pest treatment. Institute effective pest control measures to prevent the entry of pests and eliminate the presence of any observed pest activity. Call SNHD at 702-250-8497 to schedule a reinspection. FIGHT the BITE

HELP PREVENT DISEASES THAT CAN BE SPREAD BY MOSQUITOES

Eliminate standing water

Prevent mosquito bites

Report mosquito activity

In August, the Southern Nevada Health District declared an outbreak of West Nile virus. This season, the highest number of human cases have been reported since the disease was first detected in the state in 2004. In addition to the high number of cases, many of those who have been ill have had the more serious neuroinvasive form of the illness.

West Nile virus is transmitted by the bite of an infected mosquito. The illness is not spread person-to-person. The best way to keep from getting sick is to prevent mosquito bites. People can protect themselves and their families by taking the following precautions:

- When outdoors, use [Environmental Protection Agency \(EPA\)-registered](#) insect repellents containing DEET, Picaridin, IR3535, Oil of lemon eucalyptus (OLE), or 2-undecanone.
- Wear pants and long-sleeved shirts when outdoors. Treat clothing and outdoor gear with repellent.
- Make sure doors and windows have tight-fitting screens without tears or holes.
- Prevent mosquito breeding by eliminating areas of standing water around homes, including unmaintained swimming pools.

Additional tips and more information about West Nile virus are available on the Health District website at www.snhd.info/west-nile and on the Centers for Disease Control and Prevention website at www.cdc.gov/westnile/prevention/index.html.

If you think you or your family member have West Nile Virus, please contact your doctor.

Residents can report mosquito activity to the Mosquito Surveillance Program at 702-759-1633. Updated information about the Health District's surveillance activities is available each week at www.snhd.info/wn-updates.
